

EUROPEAN MUSIC PORTFOLIO – MATHS: SOUNDING WAYS INTO MATHEMATICS

**...makes innovative solutions
accessible for teachers in Europe.**

The project is developing innovative and creative approaches to make the learning of mathematics and music more interesting, inquiry-based and engaging. This approach can have particular benefits for low achievers and students at risk.

The project aims to enhance the quality and European dimension of in-service and initial teacher training courses by introducing a tested training curriculum dealing with interdisciplinary approaches to the teaching and learning of both mathematics and music.
