

M 5 Theory 1

Music theory

During the first year basics of music theory (notes, intervals, accords, scales) and rhythms (value of notes and pauses, simple and composite meters) will be taught. Through exercises in score reading and acoustic analysis the understanding of musical and formal connections will be trained.

Dance video / Dance films

A series of various dance films will be shown in order to illustrate the possibilities of dance in the medium of film/video, the styles of different choreographers and the use / application of music and further thematic focuses.

Introduction into academic research

Basic techniques of academic research will be taught. Writing and classifying scientific texts, literature and Internet research, will be dealt with in a scientific way. Issues that can be chosen individually creates an experience, which stimulates exploring one's identity and future professional interests. In addition to artistic expression a new dimension allows to enlarge the scope of the experience in a theoretical and reflective way.
